WORK EXPERIENCE

Founder and CEO

Delta Tech Labs

10/2018 – Present

Creating the next generation of data lineage and trust driven distributed business solutions for enterprises with the help of an in-house developed custom tech stack for Blockchain.

Achievements

- Created a technology centric, business value driven company with customers that include SME, NGOs and companies valued in excess of \$500Mn.
- Sustain-ably bootstrapped the business, until now closing a Series A round.
- Lead Product Development, and struck strategic partnerships across 3 continents and 7 countries.

Freelance Consultant

Self

06/2016 – Present

USA, India.

Worked with several companies, research institutions and startups over the past few years including TIFR, KITP-UCSB, IFMR LEAD, Government Education Schemes, and technology centric startups.

Achievements/Tasks

- Research Assistant for Computational Physics - CV and ML for phase change pattern recognition in self organising systems. (TIFR)
- Was the Blockchain Architect for the BFF App. (EiR - Nvidia)
- Developed core machine learning pipeline for FitAssist App and many more.

Co-founder

BasicCare

01/2018 – 05/2019

New Delhi, India

BasicCare is a moonshot AI-based platform capable of providing medical diagnostic services for next to free cost, that aims to make healthcare more accessible across economic and social boundaries.

Achievements/Tasks

- Led the core machine learning engine development team, in collaboration with the subject matter team from research project stage to viable business.
- Successfully pivoted product and business multiple times, until team fell apart due to long gestation period in HealthTech Industry and low returns.

Inclusive Tech

Data Driven Policy

VOLUNTEER EXPERIENCE

Neev Project (08/2017 – 12/2017)

- Taught computer science to underprivileged kids in Haryana villages to introduce them to computing and help them get used to using technology in their day to day lives.

BasicEdu (10/2018 – Present)

- Democratizing computer science education and making it more inclusive by creating a network of volunteers who build simple computers that plug into CRT televisions for a fraction of the cost of laptops and design the curriculum associated with it.

Grassroot Innovation Programme (12/2018 – Present)

- We inculcate a mindset towards innovation at the grassroot level through experience driven learning to solve local community based problems. See project Grassroot Innovation Programme
